PRESIDENT'S MESSAGE

I suppose I should nostalgically review the trivia of this past school year because that seems to be the pattern which presidents of the past have followed. I feel I should break this pattern this year and touch on a few things which, in my opinion are much deeper.

To-day we hear a great deal about apathy in our society, especially student apathy and, on a larger scale, the apathy of "the great silent majority". It is generally accepted that those who are silent are in agreement with the "status quo". I believe that apathy is not agreement, but a failure on the part of individuals to answer the basic questions, "Who am I?" and "Am I happy with the world around me?" Apathy is a failure to come to grips with life. If an individual were to successfully answer these questions after having thoroughly probed his basic existence, he must then act on these answers.

However, many people fail to answer these questions satisfactorily; in fact, many seem never to ask the necessary why. They go through high school with only one goal—to obtain their diploma and get out with hardly a backward glance. They may go on to further their education—but always with the same mean goal. Then they are prepared to enter the "rat race", never understanding, never coming to grips, but of course, with all the fringe benefits—a wife, a car, a family, and a color television. All they strive for is security. Their god is the almighty dollar.

What then if the individual should want more from life than this shallow existence? What if the individual does question the structure of society and the status quo? To drop out of society, to shrug off the establishment is not good enough. This issue cannot be avoided. It is up to the individual, especially to the individual in the younger generations, to remain in society questioning the status quo, trying to change society for the better. It may appear hopeless and futile, and it will be a great temptation to give up, either by dropping out or remaining silent, but there is no reward in that. To force social change, it is necessary to become involved. This involvement may be small; by the responsible way in which we vote, or by a healthy attitude towards other people, just by caring or showing a little love.

For many, it is not easy to become involved. There is a desire to do something, but it seems to dry up before fruition. Strong feeling of inhibition, frustration, and futility ride over all. My hope is that for the many who do find involvement difficult they do not despair and can eventually become involved with a little help from their friends.

I have one last thing to say before closing: I have enjoyed this past year and the honor of being President with all of its frustrations and joys.

THE ROLE OF YOUTH IN OUR SOCIETY

There is no doubt that to-day's youth is far better informed, in the broadest sense of the term, than any have ever been in the past. Educational methods are being up-dated all the time. More and more audio-visual material is being used to help make study more profitable and useful. News media—newspapers, radio, and television—provide virtually instant news. A whole, new, wide field has opened to our young people.

Perhaps the awakening is too sudden. Perhaps it's too great a blow when the eager, idealistic youth comes face to face with the discouraging realities. No wonder that there is frustration and bewilderment in those youthful minds that have not yet had time to mature fully. Maturity is not the inevitable result of education but comes only through practice in handling the responsibility of life and work. Opting-out—rejecting participation, refusing to join in the fight—is simply turning one's back on maturity and wisdom.

It is imperative that a climate of mutual understanding be established between the generations. If a "generation gap" were to become a permanent cleavage due to youth's lack of confidence in the good will of their elders and the frustration of the latter, we should never achieve that "Utopia" of which we all dream. Youth must be ready to give their elders credit for the latter's experience and their numerous and significant achievements. On the other hand, the older generation must grant youth an understanding and appreciation of their enthusiasm, their zeal and their impatience to get on with the job.

To our graduating class let me say that we, the staff of Gordon Bell, appreciate all that you have done for the school. We have really enjoyed working with such a fine group of young people. If you continue the good work that you have begun here, face life with an open mind, the world isn't going to be such a bad place after all.

My wish for all of you is a useful and happy life.

F.A. Hodgkinson

Vice Principals

The year of the big shuffle—the new look—Gordon Bell's building program—these are the kind of thoughts which first surface when one begins to look back over the past school year. These thoughts soon give way to feelings of appreciation for the opportunity of associating with a fine staff and student body who have made living through this turmoil a great experience. Perhaps my feelings about our school are better conveyed by the words of the poet Richard Lovelace who said:

"Stone walls do not a prison make Nor iron bars a cage"

Gordon Bell's greatness lies not in its large carpeted areas, its resource centers or new library facilities, but in the people who work, teach and learn therein. To those who work and teach, may I extend my thanks for the privilege of being counted among your number. To those who have learned the lessons of high school and now stand at the doorway to their future, may it open into a bright and happy one for you.

R. Mutchmor

I recommend to all students, for their careful consideration, the following message from the Hall-Dennis Report, **Living** and **Learning**:

"The underlying aim of education is to further man's unending search for truth. Once he possesses the means to truth, all else is within his grasp. Wisdom and understanding, sensitivity, compassion, and responsibility, as well as intellectual honesty and personal integrity will be his guides in adolescence and his companions in maturity."

If possession of the means to truth, which promises such rich rewards, is within our grasp, I submit, no sacrifice is too high a price to pay for so rich a treasure.

My sincere congratulations and best wishes to the graduating class.

Daughter

In a small five-room, two-story dwelling on the outskirts of Guayaquil, Ecuador, lives a little girl, one of a family of nine. She is a tall, slender girl with brown hair and deep, dark expressive eyes. Her high aptitude for learning has showed itself in her marks at school. She takes an interest in all her school work (her favourite subject is writing) but always reserves time for helping others and does household chores for her mother. As you have probably guessed, I am talking about our foster child, Bella Esperanza Chavez.

Bella's father, a truck driver, earns \$40 a month. Out of this meagre income he pays a number of monthly expenses: rent \$7.50; electricity \$1.75; charcoal \$1.50; food \$25.00. (By the way, Esperanza and her seven brothers and sisters eat two meals of mainly cereals and milk and small quantities of meat per day.)

Under Plan, Gordon Bell helps Esperanza by sending her \$51 quarterly, along with occasional Christmas gifts and birthday parcels. The financial donations will terminate (as set by the sum acquired by Charity Drive 1968) in late 1972. That should set all of us to thinking about what we're going to do when this time expires.

Here, then, is a note from our little girl: "Dear Foster Parents,

It is a great pleasure to greet you and your dear family, I wish you are all in good health. I tell you that I got the first place at school, this is because I have gotten good marks. Answering your question of what the kids do when they are on vacation, I tell you that most of them spend their time with their parents at the beach, like in Salinas, Libertad, Playas, Punto Carnero, etc. These are during the months of February, March and April. This is all I have to tell you, so I close now with a hug.

Your foster child, Bella Chavez''

Good luck, Bella, Keep in touch.

A Great Canadian

On April 29, Gordon Bell was honoured with a visit from the Right Honourable John G. Diefenbaker. He addressed a group of mainly grade eleven students in Room 129. He spoke with vigour and enthusiasm, in the typical John G. style, on the Canadian identity, as it relates to youth.

Brian O'Leary presented Mr. Diefenbaker with a plaque from the students of Winnipeg's high schools, and Brien Chomica thanked him for his visit.

The School Tea Zodiac Capers

A Paper Flower Sale

On March 15th, attention in Gordon Bell was focused on the lunchroom. It was a bustle of activity known as the school tea. For weeks, students had been preparing decorations, selling tickets, and getting mothers to donate baking. Thanks go to all the teachers, students, and parents who helped make Zodiac capers one of the most successful teas ever.

The Midway

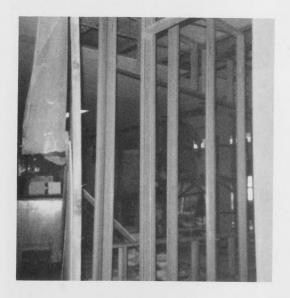

Construction

Gordon Bell has been in the midst of construction for the greater part of last year. Lockers have been moved, doorways blocked, and walls torn down. This construction has resulted in new English, Maths, Physics, Chemistry and Biology departments, a new library and an extension in the offices. Many of the usually bright-eyed students can be seen walking in a daze among the maze of two-by-four's and sawdust. Now we have a school of which we can be proud, and a school to confuse our glorious grads every alumni day.

The year of 1969 for the G.B. Panthers football team may have seemed like one of bitter defeat and loss for the spectator. The scoreboard and statistics don't show the whole picture, though, for even if the team did meet with frustration and disappointment, most players ended the season with a marked sense of self accomplishment. Considering our eligibility rules and limited number of players, coaches Mr. Wilkes and Mr. Simpson did an excellent job of producing one of G.B.'s best football teams. The team didn't get "the breaks", but at all times displayed great quality of football and good sportsmanship. If next year's team shows the spirit and determination of this year's Panthers it should end up in a city championship.

Mr. Peter Magda of 214 produced this plaster Budda. Others in the picture are by Ed Pittner (left side) and Gerri Innes (right side).

Doug Allard of 10-217 was one of the top "option" students. He produced this excellent likeness of a train engine in just 12 hours.

Guy Mullin of grade 12 working on a styrofoam sculpture.

Bill Collicutt 10-215 Plaster Sculpture
